PROJECTS

CashMate

- A mobile app from our undergraduate thesis that detects Philippine banknotes using image recognition, provides voice-assistant support, and includes a digital wallet to store and sum recent captures.

BlissBites <https://kayichin.github.io/CIT236-FinalProject/splash.html>

- A course requirement project using APIs, featuring a website that sells cakes and sweets, with Firebase as the database for managing products and orders.

Photography Shots <https://wllmstd.github.io/PhotographyShots/>

- A personal website featuring my favorite shots, showcasing photography and photo editing as both my hobby and my way of coping.
